

Firearms Training

Wilplan Training Ltd.

Security Industry Training Consultants

Carrying firearms in any environment is a big responsibility on both the individual and the organisation. The firearms system taught by Wilplan is unique and has been adopted by multiple agencies, police units and Special Forces around the world.

The techniques taught are designed to instil confidence, safety, speed and accuracy to allow the operator to apply the techniques to any set of tactics or standard operating procedures. This allows a seamless integration and standardisation of weapon handling for any organisation employing armed officers.

The course is ideally suited to anyone who works in an environment where they are carrying, or are likely to carry, a sidearm including military and law enforcement agencies, security personal, border agencies and civilian enforcement. Even those with many years of military experience have testified in the benefited from this course which builds on existing knowledge and experience gained within the military or law enforcement.

"Really impressed with the whole safety aspect-it was nice not to be babysat. Learnt some lessons about accuracy that will stay with me and help me identify issues I may have in the future- over all a brilliant package - It should be adopted to improve our troops effectiveness."

The system finds its roots from the research and teachings of Gerald Taylor, a former Vietnam Veteran and US Police Officer. The system has since been further developed in line with the requirements of many agencies around the world and has been adopted by: the Swiss Military, Private Security Operatives and Police Units around the world. It is now quickly becoming the standard required by many organisations.
